Cool-it II

Cool-shelf

General Description

The Cool-it II and Cool-shelf are related Active Thermal Management equipment coolers; they are designed to boost existing (but insufficient) ventilation for one audio or video component. Both are installed by placing them above the overheated equipment, and both blow fresh air down into the amplifier, receiver, etc., reducing their internal temperature.

Not for use in sealed enclosures; work best in areas with restricted (but not zero) ventilation.

Cool-shelf additionally forms a shelf onto which a heat-sensitive item, such as a DVD player, can be placed. (Weight limit is 20 lbs.)
