It's true! Conventional multi-room sound systems typically amplify music at a centralised source and send the signal over metres and metres of inefficient speaker cables. This results in sound quality loss, not to mention extra equipment and cabling. Whereas Forté A-BUS unique technology amplifies sound at the keypad in each zone. This means one low cost cable replaces the conventional cable combination and saves you time, money, and gives superior sound quality.

### Why Forté A-BUS?

Connects to any stereo system, Home Theatre and/or A-BUS/READY™ receiver and source component

Cat-5 cable and local keypad amplification to rooms, creates minimal signal loss to speakers

Modular to mix and match keypads per room depending on the level of control you desire

Custom built-in to your home as single-source, multi-source or multi-zone system for 1-100 rooms!

Any room can play any source simultaneously

Sources are centrally located in a TV or Home Theatre room with surface mount hubs

Sources can be locally located in each room with structured wiring hubs

IR sensors on keypads or flushed-in speakers have a 20 metre range

Upgrade existing A-BUS wired homes in minutes not days as your lifestyle changes

Very low heat output as Forté A-BUS is meant to be used all day every day

Interior design friendly - no bulky components, messy cables or dusting

Very low energy consumption (4 rooms have the energy draw of a single light bulb)

True audiophile sound quality, reliable, easy and fun to use!

It's an investment for higher home re-sale value.

Clear and easy communication and control of the gate/door entry provides security and comfort throughout your home. Simple, secure and stylish the Forté Intercom takes intercoms to a whole new level. Forté Intercom also uses a single run of stranded Cat-5 cable to each room and can interface with an Forté A-BUS\* multi-room audio system (simply plugs right in), ensuring seamless integration between intercom and audio distribution throughout your home.

### Why Forté Intercom/A-BUS compatible?

Runs on one Cat-5 cable to connect to each room or door station

Star-wired hub allows up to 8 control centres/room units and 2 door stations

Your choice of room and entry units (all interchangeable)

High quality electret microphones with automatic gain control can pick up voices anywhere in the room

Installed on its own or integrates automatically with Forté A-BUS\* audio systems, without extra equipment  
*\*Single-source interrupt ability.*

Includes door strike interface cable for door/gate release

Door openings are timed, no two doors open simultaneously

Group page or one-to-one communication is available

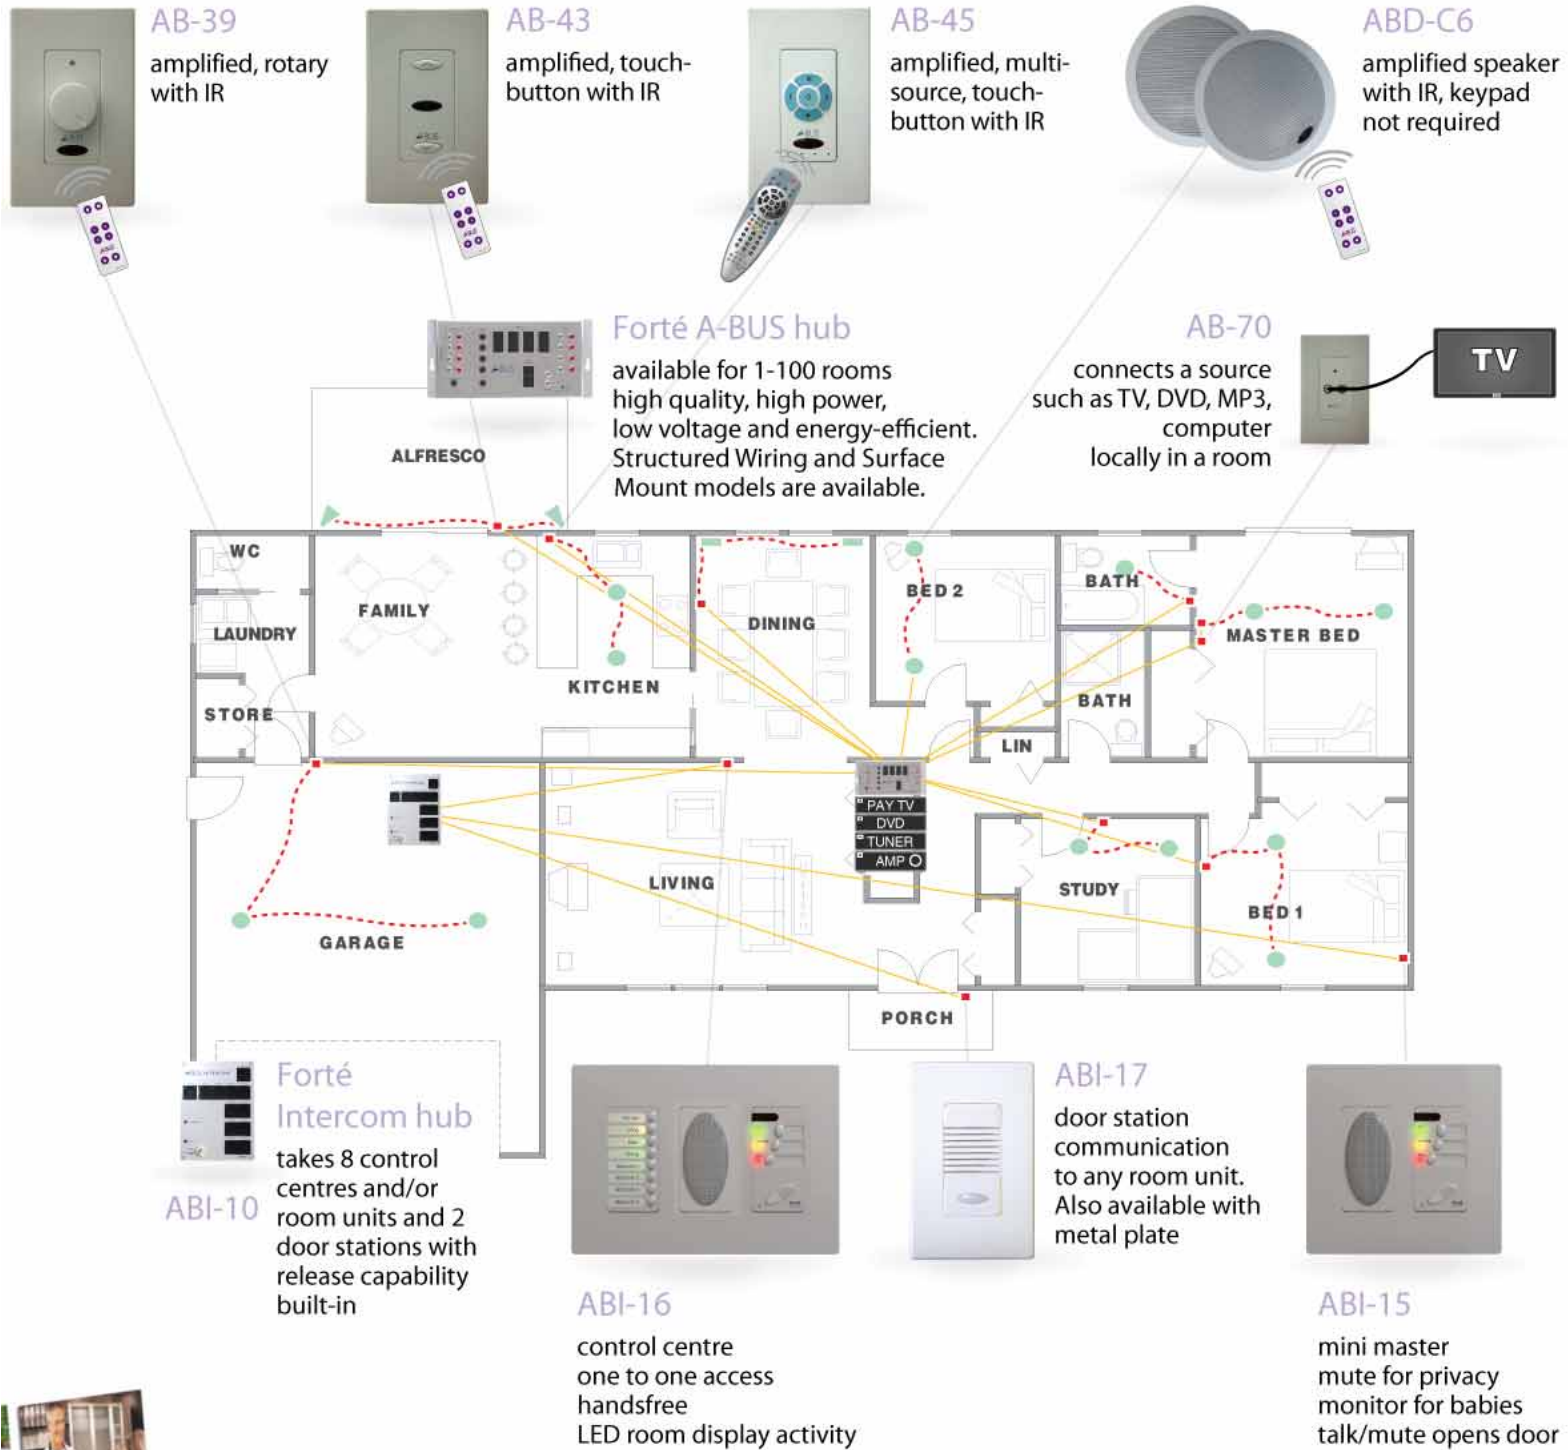

Mute and Monitor for privacy and baby monitoring is onboard

You can select from 6 door chimes

# Make Your House A Home

## CHOOSE YOUR ROOM, KEYPAD AND INTERCOM UNIT
