

## Active Wall Mount Indoor & Outdoor Speakers

No matter where you want your music, A-BUS built-in music system can deliver with the new A-BUS/DIRECT WALL Active Indoor/Outdoor Speaker

This Class D speaker continues the A-BUS philosophy of multi-room made easy. Only a single Cat-5 cable is required from the hub or A-BUS/READY receiver to the active speaker ensuring high quality audio. The sound quality will delight.

The attractive speakers are ideal for both indoor or outdoor use with UV protection and an all weather design.

### Why A-BUS/DIRECT WALL speakers?

- Great for retrofits or building a new home
- Indoor or outdoor use
- Energy saving design
- No need to get a cable down the wall for keypad control
- Class D amplification to suit outdoors
- High power remote keypad works in sunlight

### Learning Remote Keypad with Wall Cradle

What makes the outdoor speaker work so well is the high powered learning remote keypad with wall cradle provides easy operation even in direct sunlight. Wall cabling is not required.

Red  
Green  
Blue  
Yellow

### Control Buttons

Stop  
Play  
Repeat  
+ Up  
- Down

### Mode Buttons

Sources 1-4

## The Control

Supplied with A-BUS/DIRECT speakers is a cradled keypad for infrared remote control.

It can be used in several ways:

1. As a surface-mounted keypad on a single-gang plate, the keypad in its 10mm deep cradle can be easily attached directly on a wall close to the speakers. Wall cavity and wiring are not required.
2. The keypad can easily be removed from the wall plate housing and used as a stand alone remote control.
3. For kitchens, the handset can be magnetically attached to a metal surface such as a fridge.

The keypad includes A-BUS commands, with additional user learning keys for simple control commands such as play, stop, track advance and preset Up/Down. It includes two long life batteries for high power and reliable operation around the room.
